OUR BARRELS MAKE THE DIFFERENCE

A HISTORY OF PRECISION

With the most technically-advanced barrel manufacturing techniques, state-of-the-art machinery, and an unwavering commitment to quality, Bergara Barrels has become the barrel source of numerous top-tier gun manufacturers in both Europe and the United States. Bergara is producing a full line of precision firearms engineered and built to showcase the performance capabilities of our world-class barrels.

At Bergara, we believe that a precision firearm requires not only the best components, but also an assembly process that is carried out by individuals who are the best of the best at their craft. For this reason, we brought together a team of the world's most talented and experienced firearm builders.

It all began several years ago when we first began with a small line of custom rifles and one top-notch craftsman, the former Production Chief and Chief Instructor for the United States Marine Corps Precision Weapons Section. As Bergara rapidly grew, we then assembled a hand-picked group.

Today, that team forms the core of our production team. They pass on their knowledge and expertise to every new employee, thereby bringing their own real world experience and expertise to every Bergara firearm.

EVERY RIFLE STARTS WITH A PRECISION BARREL

STEP 1 FACE TURNING

The solid bar is face turned in order to assure straight deep hole drilling. Each Bergara barrel must begin with a straight bar of cylindrical steel. We inspect every bar to ensure it meets a deviation of less than 4/1,000 (or .004) of an inch. Many barrel manufacturers never even evaluate this aspect of a barrel and consequently hinder the barrel's accuracy potential.

STEP 2 DEEP HOLE DRILLING

Once the steel bar is straightened, it moves on to a four-spindle deep hole drilling machine where a specialized bit drills a perfect hole through the entire length of the bar.

STEP 3 TURNING

Turning the barrel before honing helps get a better bore finish.

STEP 4 BARREL HONING

Most other barrel manufacturers move from deep hole drilling to reaming, a process that leaves tool marks in the bore. Instead of reaming, Bergara uses three separate honing spindles that utilize diamond tipped bits that polish the interior surface of the barrel to a mirror-like finish that is almost completely free of tool marks. This time-consuming step lends Bergara a level of accuracy on par with barrels costing much more.

STEP 5 BUTTON RIFLING

A carbide rifling button is drawn through the barrel to produce the rifling grooves at the appropriate twist rate for each caliber. This produces a groove diameter deviation of less than 2/10,000 (or .0002") of an inch. It's the same result that many gunsmiths accomplish by hand lapping.

STEP 6 STRESS RELIEVING

Finally, a high temperature heating process realigns the steel molecules ensuring that the barrel is free from any stress after the button rifling process. Doing so the barrel will be more reliable and will last more rounds.

PREMIER SERIES

PREMIER SERIES

Think of our Premier Series as an extension of our US Custom Series, but with standardized features for greater efficiencies in parts production and assembly – providing near custom performance at prices that are affordable to serious shooters.

Bergara’s premium stainless steel barrels receive a proprietary honing process at our barrel making facility in Bergara, Spain. Then, at the Bergara USA factory, the barrel receives a Cerakote™ finish and is coupled with our proprietary Bergara PREMIER action, featuring a nonrotating gas shield, coned bolt nose, and sliding plate extractor.

Premier Series rifles are built by hand and offer each shooter a wide variety of stock options. Choose from multiple carbon fiber, fiberglass, composite, and precision machined chassis stock offerings. All Premier Series rifles are built around legendary Bergara barrels and feature world-famous TriggerTech® triggers, among other industry-best components. All rifles are hand assembled in house by our qualified builders to our exacting standards and precise specifications and are guaranteed to produce sub-MOA groups using factory ammunition.

FEATURES

BERGARA PREMIER ACTION	<ul style="list-style-type: none">• Premium stainless steel with Cerakote™ finish• 2 locking lugs located on the front of the bolt head• Separate “floating” bolt head assures contact with lug abutments• Cone-shaped bolt nose assures smooth feeding• Sliding plate extractor• Ejector is a spring loaded plunger located in the bolt face• 1-piece stainless steel bolt body with threaded-in bolt handle• 90° bolt throw angle• Firing assembly is bayonet style allowing quick access to the firing pin assembly Simply twist the bolt shroud and the entire firing assembly can be removed without tools
BERGARA BARREL	<ul style="list-style-type: none">• Made from 410 AISI stainless steel• Cerakote™ finish• All Premier Rifles are guaranteed to produce sub-MOA groups at 100 yards using quality factory ammunition
TRIGGER	<ul style="list-style-type: none">• All Premier rifles feature externally adjustable TriggerTech® triggers and Frictionless Release Technology™ as standard equipment
SAFETY MECHANISMS	<ul style="list-style-type: none">• The 2-position safety is part of the trigger assembly. It allows the rifle to be unloaded while in the safe position• Non-rotating gas shield behind the bolt head protects the shooter from gas and debris in the event of a case or primer rupture

B-14 WILDERNESS SERIES

B-14 WILDERNESS SERIES

The Wilderness Series tackles the need for rifles that can withstand the rugged and unforgiving wilderness while blending into those very same elements – hence Bergara’s hand-painted camouflage stocks with added webbing for increased texture and grip. All Wilderness Series barreled actions feature Sniper Grey Cerakote™ finishes for advanced protection in extremely harsh weather. The Terrain, HMR, and Ridge models also feature a seamless, omnidirectional, and multi-ported muzzle brake that will reduce felt recoil by up to 35 percent.

The B-14 Wilderness Series provides a great deal of added value for the hunter that wants a no-nonsense performer that is built to withstand the backcountry. We are breaking through the uninhabited and inhospitable regions to bring you the weather protection needed to withstand these conditions.

We believe the word wilderness, while may be rugged, harsh and unforgiving, describes an experience rather than a location. We built the B-14 Wilderness Series to match every stride taken off the beaten trail.

FEATURES

BERGARA B-14 ACTION

- Spring-loaded ejector
- Side-mounted bolt stop
- One-piece body with two locking lugs
- 90° Bolt throw angle
- Cone-shaped bolt nose ejector - assures smooth feeding

BERGARA

EXTREME SERIES

B-14 EXTREME SERIES

The Bergara Extreme Series Hunter Rifle is Bergara's newest offering, geared towards extreme conditions rifle shooting. This rifle features Bergara's B-14 action mated with a 4 tapered (16.6 mm), stainless steel Bergara barrel with Cerakote™ finish. The barrel is threaded and 18" length. This new rifle is less than 1 meter long and weighs less than 3 kg (6.6 lbs) what makes it perfect for mountain and rough conditions hunting.

The entire Extreme Series brings Bergara Barrel accuracy to a line of hunting rifles that is affordable to serious big-game hunters. Built in Spain, this rifle delivers a level of quality and performance that is unmatched in its price range.

It's outfitted with a Bergara curved adjustable trigger we designed to guarantee a crisp, clean pull every time you fire the rifle. The Extreme Series Rifles are available in .308 Win. caliber and 6.5 Creedmoor with hinged floor plate or detachable magazine and open sights are optional. All Extreme rifles are capable of producing 1.0 MOA groups or less at 100 yards using factory match grade ammunition.

FEATURES

B-14 SERIES

B-14 SERIES

Our B-14 Series brings Bergara quality and accuracy to a line of rifles that is affordable to almost any serious big game hunter or shooter. Built in Spain at our state-of-the-art production facility, our highly-efficient manufacturing and assembly techniques allow us to deliver a rifle with a level of quality and performance that is unmatched for the price.

B-14 Series rifles feature the world-famous Bergara barrel, which is complemented by our own super-smooth B-14 Action. This action features a coned-bolt nose and breech, ensuring smooth feeding and a sliding plate extractor for proper alignment. The Bergara 4140 CrMo steel mated blued barrel is finished in Black Graphite Cerakote™. Lengths and contours vary by model. Stocks are designed in various styles to ensure proper fit for every shooter.

B-14²

The new B-14² concept stands for adding a proprietary development of a carbon fiber monocoque stock. Developed 100% in carbon fiber, this stock has an internal structure that provides greater rigidity, strength and prevents the stock from breaking.

Featuring this new stock to our B-14 action and our well-known barrels, we blend all the advantages of the model series, converging into something unique, which we have called B14 squared.

NEW CERAKOTE FINISH

FEATURES

BERGARA B-14 ACTION

- Spring-loaded ejector

RIMFIRE SERIES

RIMFIRE SERIES

The Rimfire Series is the natural evolution of Bergara continuing its journey forward. Due to the fact that we have been making highly accurate rimfire barrels on an OEM basis for over a decade, we are confident that we can deliver exceptional performance and relevant features that make your rimfire shooting experience more successful.

With our advanced expertise in engineering, we combined three distinct platforms that serve completely different needs such as plinking and hunting as well as serious competition shooting.

The Bergara BMR (Bergara Micro Rimfire) is for those that demand the best and expect nothing short of perfection. With the option of either a 5rd magazine for hunting or a 10rd magazine for running stages at your favorite rimfire match, we designed the BMR from the ground up with field and match performance in mind.

The semi-automatic BXR series is ideal for plinking and hunting. The series bridges the gap between mass produced models and boutique brands. The BXR series is compatible with certain Ruger® 10/22® components and is available in either chromoly steel or carbon fiber tensioned steel.

The B-14R is specifically designed for long range rimfire shooting, training, and competing. It features a full-size 700 footprint and accepts many after-market components including stocks, triggers, and mounts. The push-feed action sports dual extractors and a full-size detachable magazine.

FEATURES

- BERGARA B-14 ACTION**
- Specialty Rimfire actions
 - Match grade chambers (B-14R and BMR bolt actions)
 - Detachable magazines
 - Left-handed available on B-14R

- BERGARA BARREL**
- Made from 4140 steel
 - Matte blued finish
 - Carbon barrel options available

- TRIGGER**
- Bergara Performance Trigger (B-14R and BMR)
 - Bergara BXR trigger (BXR)

- STOCK**
- Bergara HMR stock, adjustable cheek, free-floated (B-14R)
 - QD Cups and swivels (BMR swivel only)

BA13 TD SERIES

For the hunter who wants a high-quality single shot rifle, the BA-13 TAKE DOWN is the ideal choice. Its sleek, lightweight, and easy-to operate design sets a new standard for affordable single shot hunting rifles. Every stock is lightweight and features Bergara's CrushZone® Recoil pad – a real plus for heavier calibers. Every BA-13 TD model is perfectly balanced in a 100% ambidextrous, composite stock making the gun incredibly quick to aim and shoot. Each rifle includes a DuraSight® scope rail, which will accept most any standard scope rings found on the market today.

The quick-take-down, tools-free disassembly, makes it easy to carry and also a great stowaway gun for the camp, boat, or truck.

Our BA13 TAKE DOWN range is a popular choice for mountain hunting. Its excellent maneuverability, its lightness and the precision of the BERGARA barrels make the BA13 TD single shoot rifle an optimal performance for a stalking rifle.

FEATURES

BERGARA ACTION

- 100% Ambidextrous stock
- CrushZone® recoil pad
- Equipped with a DuraSight® weaver-style rail
- Reversible cocking spur
- Trigger guard actuated breech system

BERGARA BARREL

- Fluted Bergara barrel
- 4140CrMo blued steel or 410 AISI stainless steel
- All barrels are threaded in 5/8"- 24 UNEF

STOCK

- Compact Synthetic design or Thumbhole stock in black color
- Other colors are available. Check www.Bergara.Online for more details
